DETAILED ACTION

- 1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
- 2. The International Search Report has been considered. The prior art included in the Report has been considered and has been made of record by way of Form PTO-1449. A copy of the Form PTO-1449 is enclosed for applicant's files.
- 3. The drawings filed 03/15/2004 are acceptable.
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kwon(US5913892) or the submitted article to Maurice-A. Julien.
- 6. Claims 1-10 and 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Hartl et al(US6585241) which corresponds to submitted WO00/38967 or under 35 U.S.C. 102(b) as being anticipated by submitted FR 2456631 or submitted JP 63-096337 or submitted JP 59-009335
- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/801,959 Page 3

Art Unit: 3683

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

8. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hartl et al(US6585241) or submitted FR 2456631 or submitted JP 63-096337 or submitted JP 59-009335 in view of submitted Kwon(US5913892).

The principal references disclose the invention substantially as claimed but not the feature of claim 11 directed to the use of the vibration-generating/damping arrangement in the refrigerator art.

The secondary reference to Kwon discloses the use of the vibrationgenerating/damping arrangement in the refrigerator art.

It would have been obvious at the time the invention was made to one having ordinary skill in the art to which the invention pertains to modify each of the principal reference, to use the device in the refrigerator art as taught by Kwon since the principal references are useable in a variety of arts concerned with vibration and control thereof.

- 9. Claims 1-10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Olgac(US5431261) or Hamada et al(US5884902) or Kato(US005967269).
- 10. The claims are unduly broad. Reconsider the Search Report and the variety of Category X references. Spring configurations having a given resonant frequency and an element having a different resonant frequency are notoriously old.

11. Applicant should note that the examiner reserves the option of requiring restriction and/or election, in due course, pursuant to MPEP 821.03, MPEP 811, etc., based on applicant's response to this office action.

- 12. Applicants should note that the examiner has requested a translation of each of the non-English references applied above from STIC within the USPTO and intends to attach translations with the next office action, if available. Should applicant obtain translations independently of the USPTO, a copy of it should be forwarded to the examiner for inclusion in the file.
- 13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas C. Butler whose telephone number is 703-308-2575. The examiner can normally be reached on m-f 5:30 am to 2pm.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
